Enzo Joulié and Marc de Fulgencio to spearhead BWT Mücke Motorsport title challenge in the 2024 ADAC GT4 Germany

- Enzo Joulié and Marc de Fulgencio will be sharing the cockpit of a Mercedes-AMG GT4 fielded by BWT Mücke Motorsport in the 2024 ADAC GT4 Germany
- Both drivers have prior experience of competing in the ADAC GT4 Germany and have already registered numerous victories and podium finishes in GT racing
- The newly signed BWT Mücke Motorsport duo will contest their first race weekend together in the season opener (26th - 28th April) at Motorsport Arena Oschersleben
- Stefan Mücke: "With this top line-up, we very definitely intend to have a say in the battle for the ADAC GT4 Germany title"

BWT Mücke Motorsport are gearing up for the 2024 season: The illustrious Berlin-based racing outfit has signed two up-and-coming talents, Enzo Joulié (19) from Andorra and Marc de Fulgencio (24) from Spain, to share the cockpit of a BWT Mücke Mercedes-AMG GT4 in the ADAC GT4 Germany.

Like so many talented drivers, Enzo began his motorsport career in karting before making the step up to single-seater racing in 2019 and 2020. In 2021, he switched from Formula 4 to sports cars and has since competed in various series, most prominently the Championnat de France FFSA GT and the GT4 European Series, in which he finished second in the Silver Cup in 2022. In the 2023 season, he also made his debut in the ADAC GT4 Germany, securing a podium finish in his debut season. He also won the GT4 Silver classification in the 2023 Championnat de France FFSA GT with three wins and nine podium finishes.

Marc likewise started out in karting, from which he graduated directly to the world of touring cars in 2017, competing in the DTM Trophy and the ADAC GT4 Germany over the course of the following years. He chalked up a maiden win in the ADAC GT4 Germany at the Lausitzring in the 2023 season. He has so far recorded one win, one pole position and five podium finishes in this particular racing series.

"We are delighted to welcome Marc and Enzo to our team for the coming season," said Stefan Mücke. "Both drivers are young and motivated, and they have already given ample evidence of their abilities with victories and podium finishes in various championships. In Enzo and Marc, we are convinced that we have found a very strong driver duo for our Mercedes-AMG GT4. With this top line-up, we very definitely intend to have a say in the battle for the ADAC GT4 Germany title."

The new ADAC GT4 Germany season gets underway at Motorsport Arena Oschersleben on the weekend of 26th - 28th April. The 2024 calendar also has a further five fixtures at different venues, namely the Lausitzring, the Norisring, the Nürburgring, the Red Bull Ring and the Hockenheimring. Each race weekend features two one-hour races, in which the two drivers of each competing car swap the hot seat around the halfway point.

About BWT

The BWT - Best Water Technology - Group is a leading water technology company in Europe, boasting the support of a dedicated team of 5,500 professionals. Their core mission centers on pioneering cost-effective and eco-friendly water treatment solutions. BWT is dedicated to delivering the safest, healthiest, and most hygienic water to households, industries, businesses, hotels, and municipalities. They provide cutting-edge water treatment systems for various purposes, including drinking water, process water, pool water, and, notably, Water for Injection (WFI) for the pharmaceutical and biotech industries. The company's research and development team continually explores innovative techniques and materials, employing cutting-edge methods to create economical and ecologically friendly products. Employees are committed to developing products that utilize fewer resources and less energy, resulting in a reduction of CO2 emissions.

Sustainability lies at the heart of BWT's identity, with each product playing a significant role in conserving our most valuable resource - water. The guiding claim, "For You and Planet Blue," underscores the company's commitment to addressing challenges on a global scale. BWT actively champions the vision to "Change the World - sip by sip" through sustainable initiatives, with a notable emphasis on reducing single-use plastics. Furthermore, their expertise is globally recognized in the development and production of high-performance membranes for fuel cells, serving as a key energy converter in the 21st century.
