## **BWT and Windhager Kick Off the 2026 Season Together with BWT Mücke Motorsport**

BWT and Windhager continue their partnership with BWT Mücke Motorsport in the 2026 season, further building on a collaboration defined by performance, innovation, and sustainability. Together with the Berlin-based team, the partners combine international racing expertise with an ambitious mindset and a shared drive to perform at the highest level. The focus is clear: delivering results on track while advancing efficient and responsible technologies.

This ambition is immediately reflected in the 2026 design. The combined BWT-Windhager livery brings together BWT's iconic PINK and Windhager's bold RED, creating a striking and unmistakable presence. More than just a visual statement, it represents precision, efficiency, and continuous progress. The same identity extends to the race gear, ensuring a consistent and powerful brand presence on and off the track.

BWT Mücke Motorsport enters the new season with a broad-based program, fielding a total of four cars across three highly competitive racing series. This reflects the team's versatility and its clear competitive ambition.

In ADAC GT4 Germany, BWT Mücke Motorsport will field a Mercedes-Benz AMG GT4. Alexander Connor returns to the team and teams up with Marius Schmid, forming a driver pairing that will contest all six race weekends together. In the Prototype Cup Europe (PTCE), the team enters two LMP3 prototypes: Mattis Pluschkell shares one car with Tobias Bille Clausen, while Markus Pommer and Mads Kjelde Larsen compete in the second entry. In addition, BWT Mücke Motorsport will also compete in the Michelin Le Mans Cup (MLMC), where Mattis Pluschkell joins forces with Maksymilian Angelard in another LMP3 prototype. At the same time, Classic Motorsport remains an integral part of BWT Mücke Motorsport's overall program.

From spring to autumn, the season will take the team to key circuits across Europe, where close competition demands precision, consistency, and flawless teamwork.

As the market leader in water treatment, BWT – Best Water Technology – delivers advanced solutions across the entire water cycle, from drinking water and highest-quality water for injection (WFI) used in pharmaceutical and biotech industries to water treatment solutions for heating, boiling, and cooling systems as well as swimming pools. Driven by its vision to "Change the World – sip by sip," BWT's signature PINK symbolizes innovation, responsibility, and positive change, inspiring a new lifestyle of hydration. Through motorsport, BWT brings this vision to life on a global stage, promoting greater awareness of sustainable water consumption. Through its products and technologies, BWT mineralizes local water and enriches it with valuable minerals such as Magnesium, Zinc, and Silicate, reducing single-use plastic and glass bottles as well as CO<sub>2</sub> emissions from transport.

This approach is complemented by Windhager – Best Heating Technology, a pioneer in advanced heating solutions. With WindhagerNXT, Windhager highlights its next generation of heat pump solutions – defined by high energy efficiency, forward-thinking technology, and reduced CO<sub>2</sub> emissions. The unmistakable bold RED translates this sustainable mindset into a clear visual statement, reflecting Windhager’s real-world impact with Purest Heating.

Together with BWT Mücke Motorsport, BWT and Windhager take their shared ambition to the next chapter of racing – where performance meets responsibility and innovation drives progress both on and off the track. Two brands. One team. One clear mission: For You and Planet Blue.

*"The ongoing partnership with BWT Mücke Motorsport is a strong example of how BWT and Windhager combine their strengths in a highly competitive environment. Together, we share the ambition to deliver top performance while continuously driving forward sustainable and innovative solutions in Best Water and Best Heating Technology. Motorsport offers us the ideal platform to make this visible – both on and off the track,"* says **Anna Grubeck, Head of Sports Sponsoring BWT.**

*"With BWT and Windhager, we have two strong partners by our side as we head into a diverse new season. Classic motorsport remains a key part of our program, with events ranging from the ADAC Hockenheim Historic and the Oldtimer Grand Prix at Nürburgring to Spa and Zandvoort. At the same time, we are pleased to also compete in the DTM with a GT4 car. With the investment in three LMP3 cars across two racing series, we are continuing to develop in a consistent and sustainable way together with our partners,"* says **Peter Mücke, Racing Driver and Team Principal of BWT Mücke Motorsport.**

## About BWT

The BWT Best Water Technology Group, headquartered in Mondsee, Austria, is the market leader in water technology. Around 6,500 employees work towards the goal of providing customers from private households, commerce and industry, hotels and municipalities with innovative, economic and ecological water treatment technologies, that guarantee maximum safety, hygiene, health and well-being in the daily use of water. BWT provides modern water treatment systems and services for drinking water, pharmaceutical and process water, heating water, boiler water, water for cooling and air conditioning systems as well as water for swimming pools.

All over the world our Research & Development teams, using state-of-the-art methods, work on new processes and materials with the aim of developing ecological and economical products. A key development issue is the reduction in the products’ use of operating resources and energy consumption and the resulting minimization of CO<sub>2</sub> emissions. The declared goal of BWT is to make perfect quality drinking water available all over the world and to reduce the consumption of single-use plastic bottles. That saves the complex transport, storage and disposal of single use water bottles. BWT pays particular attention to sustainability, social responsibility and the careful use of limited resources, with the aim of leaving a beautiful, livable world for future generations – according to the claim: BWT - For You and Planet Blue.
